# Stickybit @ Hyper Island

presenting the back end magic behind the glossy front end
A two day workshop

Stuff that matters

- Interact with REST based web services

- Model your world with Neo4j

- Manage your code with git

- Publish with Heroku

- and of course programming!

Coders rule the world

 +

- Lets get to work. Learn enough Python to interact with a web service. You have 8 hours..

- Be polite. Speak proper JSON!

Learn about..

- The power of the worlds most popular app engine at your fingertips. A git push away

- A 90 minute demo with examples..

Who wants tables?

- Graph data bases and the world of relations

- Taking your business from the whiteboard to the most powerful tool in the world of data modeling

and all the pieces matter

- Turn things around and build a proper REST interface for your future back end.

- Back end? Oh yeah. We forgot. Use Flask and create! Publish your API and push it all to Heroku.

- Tag on a Neo4j based recommendation engine.

- Play for fun and profit!
